

Observant

I N N O V A T I O N S

Observant is a British SME that designs and manufactures panoramic camera systems

Our cameras incorporate novel optical arrangements to achieve undistorted continuous 360° surveillance in real time.

PATROL is a camera system purpose built for mobile use, designed to be mounted above a vehicle.

SENTRY is a static, wall or mast mounted version for infrastructure surveillance and monitoring.

We provide all around situational awareness, never missing anything.

Project Ideas

- To develop a demonstrator of optical PTZ within a panoramic FoV
- To provide visual situational awareness to other projects' systems

What's innovative?

Spatially accurate real-time imaging of a 360 degree field of view using novel optics and software

What we can offer

Panoramic imaging cameras & technology to provide all around look out capability

We are seeking

- Real-time control expertise to implement optical PTZ
- System developers who need panoramic imaging capability
