About us

- We are a micro business.
- We registered in March 2010.
- We are developers of web-applications focussed on SC/logistics/transport.
- We are passionate about increasing logistics/transport efficiency.
- We are poised to rapidly expand 😊!

What we can offer

- Cutting-edge performance reports.
- Application development.
- Internship - Operations Research.

What or who we are seeking

- Data owners.
(transport users / transport providers.)
- Sensor technology companies.
- Integration partners.

What's your innovation/idea

- **Delivery control reports.**
- Our uniqueness is our ability to see through big data to identify and then to visualise mission critical issues.

What's the market opportunity you are addressing

- Huge areas of waste and unreliability in logistics and transport operations.
 - road / rail / air / sea.
 - passenger / freight.
