About us

- Mobile tech developers: transport apps & the platforms that power them.
- Public sector contracts: Traveline, TravelWest, Bristol Futures API
- In-house products: Bus Checker – now launched globally.
- Transport data processing and conversion:
 - TransXChange, GTFS, CIF, generic XML/CSV, other ‘big data’.

What we can offer

- Mobile app & tech development.
- REST API platforms - scalability
- Transport data processing and conversion.
- Large mobile app user base.

What or who we are seeking

- Transport operators – all modes.
- App developers & OS partners
- I.T. academics & researchers in the field of networking software.
- Networking infrastructure partners

What's your innovation/idea

- Context-aware mobile devices on public transport – your phone ‘knows’ about the vehicle you’ve boarded.
- Implemented via Bluetooth LE ‘iBeacon’-type discovery.
- Huge benefits to travellers, operators & data consumers.

What's the market opportunity you are addressing

- Operators: better metrics, instant customer notification & feedback.
- Developers: better apps and O/S level services via context-aware devices.
- Data consumers: free, granular and complete access to Open Data.
