About us

- UK-based SME tech start-up using data visualisation to radically improve **collaboration** with machine learning
- We focus on the business problem: answering the question "**who should you be working with?**"
- We deliver the user community for the rail industry's "**Unlocking Innovation Scheme**", <http://uis.connector.services>

What we can offer

- We can help you promote your skills capabilities to a fast-growing community of innovators
- We can help you source academic partners on the basis of what they've done, not what they say

What or who we are seeking

- More sign-ups to <http://uis.connector.services> (free)
- Collaboration challenges (lots!)
- Spreadsheets of capabilities & contacts (we'll do the rest)

What's your innovation / idea

- You don't need to fill in a big profile – the system builds it from your website
- We use semantic intelligence & machine learning to understand your capabilities & keep up to date

What's the market opportunity you are addressing

- Finding the **right** people to work with
- Making it **easy to source & build** teams & consortia
- Making it easier to **collaborate** across complex networks / supply chains
- Unlocking value from existing data **fast**
