### About us

- Founded in 1992, May & Scofield is a UK based electronics company
- We design and manufacture electronic products and systems for the Automotive, Defence, Industrial and Rail markets
- Privately owned company located in Basingstoke, south west of London
- All business functions are carried out at our design and manufacturing plant including P.C.B. lines, system build and test

## What we can offer

- Custom design and manufacture of electronic control units and / or populated P.C.B.'s for a wide variety of applications from AWS to on-board Wi-Fi

## What or who we are seeking

- New customers and partners in the rail sector who have a requirement for custom engineered electronic products or systems

## What's your innovation/idea

- The ability to solve electronic control system challenges and offer a quality solution that is manufacturable, cost-effective and reliable by using our broad capability and focussed expertise

## What's the market opportunity you are addressing

- Providing the technology for;
  - Customers' concepts that have yet to be developed or manufactured
  - Offering improved design and manufacture of existing products
  - Providing solutions to obsolete electronic systems
