About us

UK based software company

Microsoft Silver partner

Gartner Cool Vendor in Social Software and Collaboration

Customers across many industries including Rail, Oil & Gas, Government, Manufacturing and more

What we can offer

- Improved collaboration, engagement, sharing, and communication for cross-industry, cross discipline teams
- Better decisions around strategy & roadmapping, projects, portfolios and risk

What or who we are seeking

- The opportunity to engage with the existing groups of companies, industry organisations and other parties challenged with planning and delivering the H2020 programme – we can have a significant positive impact on the success of the programme

What's your innovation/idea

- SharpCloud is data-driven, visual communication software for business.
- On day one your business teams can pull together data, videos, feedback and presentations in compelling visual stories and when ready they can share with their private stakeholder communities.
- Available on G-cloud compliant Microsoft Azure cloud and on-premise, sign-in through O365

What's the market opportunity you are addressing

- The need to share, communicate and build knowledge across all industry stakeholders
- Flexible, engaging visualisation and storytelling as a way to achieve better decisions
- Adoption of the cloud as an enabler of collaboration and sharing
