

# Simulation & Modelling Best Practise

A project funded by Innovate UK

## Discussion

25 February 2016

Lynne McGregor

Innovate UK

Innovate UK

# Feedback from Breakouts

# Next Steps

## We want to:

Continue to build the community

Use the results of this project as fully and successfully as possible

Support new users to take up the use of simulation

Support current users to get more value out of simulation

Encourage the development of new tools and methods to help address the challenges facing industry

# NAFEMS

Presentations and discussion sessions in the NAFEMS UK conference (and our other regional conferences)

Webinars to present the findings

Reports in NAFEMS magazine Benchmark

Distribute links to the recordings of the Feb 25<sup>th</sup> meeting

Distribute project reports

Benchmarking services using data from project

Other events in collaboration with KTN (regional roadshows, industry themed workshops etc)

Manage and maintain SimBest website ([bit.ly/SimBest](http://bit.ly/SimBest)) and use the Capability Map to help connections

Support industry with access to appropriate technologies and good links to UK academic community

Aim to promote increased use of simulation within industry, across all the sectors

Help academia make appropriate connections with industry.

# Innovate UK

Continue to fund innovative modelling and simulation projects

Work with EPSRC to ensure that new research is translated into commercialisable products and services

Fund Knowledge Transfer Partnerships to assist transfer from academia to industry

## What else should we do?
