

Marine biotechnology for human health and personal care

GlycoMar is a specialist biotechnology company developing novel glycobiology products from marine organisms

GlycoMar's products are built on a unique skill set:

Our chemistry

- polysaccharides
- oligosaccharides
- glycosaminoglycans

Source

- marine invertebrates
- microalgae

Applications

- anti-inflammatory drug discovery

psoriasis

respiratory inflammation

inflammatory bowel disease

- personal care

cosmeceutical

nutraceutical

GlycoMar is seeking partners for its psoriasis and IBD development programmes.

GlycoMar welcomes the opportunity to participate in collaborative development projects which exploit its unique skill set.

To discuss partnering and collaboration opportunities contact:
