

Norilia is entering the world of bio refining

Norilia AS is a daughter company of Nortura SA – the major player in Norwegian meat industry

Norilia handles all rest raw material outside the meat products from slaughtering, cutting and processing of beef, pork, lamb, chicken and turkey - all together 150 000 t/y

Today we sell to traditional markets for human consumption, pet-food, fur farming, tanneries, textil mills and rendering.

Tomorrow we will, with help from modern bio refining, sell more purified and specialized proteins, fats and minerals.
