Industrial Biotechnology Showcase

11-12th February 2015. QEII Conference Centre, London

A major event to bring together industry,
academia and government agencies working
towards a bio-economy

The **Industrial Biotechnology Leadership Forum (IBLF)** is an industry-led and government-sponsored initiative designed to accelerate the development of a bio-economy in the UK. The activities of the IBLF, with funding from the Technology Strategy Board and BIS, focus on stimulating business innovation, supporting future generation scientists and creating a positive environment for bio-based technologies.

The UK is recognised as one of the key global locations for the development of IB products and processes, and is well on the way to realising the predicted £12bn market by 2025. The IBLF is key in driving this target following recommendations made to government on how UK companies could maximise the opportunities a bio-economy can deliver.

**Industry Presentations
Technology Showcase
400+ delegates expected
Exhibits from industry leaders and innovators
BBSRC Networks in IB & Bioenergy Showcase**

The conference will provide an excellent opportunity to exchange ideas, build strategic partnerships and find out how to access the expertise, funding and resources to develop and grow your business. There are plenty of opportunities for you to raise the profile of your organisation through sponsorship, exhibition or pitching your technology. Visit the website or contact Michelle Carter:
