

Nano4Life 6th Annual Conference & Exhibition

*Converging Nanotechnology with the Life Science
Industry*

EXHIBITOR PROFILES

DSTS

DEL STARK TECHNOLOGY SOLUTIONS
www.delstark.com

Bringing YOUR future into STARK focus™

JE SCIENCE

Del Stark Technology Solutions is a nanotechnology consultancy and **JE Science** provides expert written content for science and technology companies and organisations. They have recently joined forces to produce and publish a series of authoritative technology briefings on the nanotechnology sector, containing up-to-date information on research, patents and business activity.

lanir.eu
FP7 Nanoscopy Project

LANIR is an EC-FP7 project that has been developing a table-top infrared chemical imaging tool with nanoresolution and tomography. This nanoscope will significantly impact nanomedicine and nanometrology and targets applications in early detection of Alzheimer's disease, nanosafety and non-destructive analysis of nanomaterials under ambient conditions.

izon

Izon Science designs and manufactures precision instrumentation for nano- and micro-scale particle analysis. The instrument systems are now used in a wide range of institutes and universities around the world. Utilising Tunable Resistive Pulse Sensing (TRPS) allows an affordable, robust and flexible technology for particle by particle analysis.

Nano4Life 2014:
Converging
Nanotechnology
with the Life
Science Industry

5th March 2014
London

NanoMedPharma (NMP) is a specialised multi-disciplinary company with a clear mission of contributing towards improving patients' quality of life. The activities of NMP are cross-disciplinary incorporating science and technology to provide the best in class nanoscience. NMP designs, modifies, produce and applies nanoparticles in medicinal products for improved outcome in diagnosis, treatment and monitoring of various disease conditions.
